How to Speed Up Supply Chain Issue Resolution by 65% and Reduce Issues by 35%

On-Demand Webinar

Duration: Oct 21, 2021 - Oct 21, 2021

Supply chain issues are growing in frequency and severity—from shortages in materials like semiconductors and plastics to power outages in China and shipping delays in Long Beach. To thrive in today's volatile world, executives need real-time visibility into supply chain issues and bottlenecks across their organization. And they need to arm their teams with new work management tools to resolve issues faster and identify root causes to prevent issues from recurring.

Join TraceLink for this on-demand webinar to learn about the latest best practices for resolving supply chain issues 65% faster and reducing the total number of issues by 35%. You'll also see how companies are enabling these best practices with innovative new issue management technology.

Featured Speakers:

Lee House, Partner, Digital Transformation at Sikich LLP, provides insights based on his work with supply chain leaders on their digital transformation journey.

John Bermudez, Vice President of Product Marketing at TraceLink, is the author of the "Supply Chain Issue Management Handbook: Achieving Operational Excellence Through Digitalization and Continuous Process Improvement." He shares practical tips and explains how companies can resolve supply chain issues faster, prevent issues from occurring, and ultimately improve on-time, in-full delivery performance.
