## Extensible TraceLink Transfer FAQs

### General

#### **What are solutions?**

TraceLink apps are extended through **solutions**, which pull together assets that define how the app looks and functions when users interact with it (i.e. the app's data model, pages workflows, roles, and policies). Solutions available in the Marketplace Catalog can be saved as Company Solutions and configured to meet a company's specific use cases and business needs.

#### **What solutions are available for Extensible TraceLink Transfer?**

The Extensible TraceLink Transfer solution provides the user interface for the Extensible TraceLink Transfer app.

#### **What is Choreography type?**

Electronic Data Interchange (EDI) involves the exchange of business data between applications in a format that everyone understands. The choreography type specifies the format of a B2B message (e.g. X12, EDIFACT) exchanged between external systems and Extensible TraceLink Transfer app with the purpose of supporting interoperability.

## Roles

### **What roles can be assigned to Extensible TraceLink Transfer users?**

The following roles can be assigned to users:

- Application Administrator – Allows users to create and update B2B connections, add users, assign users roles, and view B2B messages within the Extensible TraceLink Transfer app.
- Member - Standard Access – Allows users to view existing B2B connections and the exchanged B2B messages.
- Link Action Developer – Allows access to view and update link action APIs.

### **How do roles provide users with access?**

Roles group a set of permissions for specific actions (either in the UI or via API), side menu items, and data within an app. The solution applied to the app or its network determines which roles are available. Administrators assign users to roles when they assign users to an app, its network, or its Links.

Owners assign specific roles to Links, which allow their Partners to assign those roles to the Partner users with access to the Link.

### **How do I add or edit roles?**

Companies must own Opus Solution Environment (OSE) to add or edit roles. If your company owns OSE and you also have the Solution Designer role assigned, you can add new roles to a Company Solution or edit existing roles by navigating to OSE and selecting Roles in the side menu. See the Opus Solution Environment Help Center for more information. If your company does not own OSE, then contact TraceLink Support for more information.

## Opus Platform

### **What are the password requirements for TraceLink SSO?**

Passwords must be a minimum of 8 characters, must *not* be your email, and must include at least one:

- Numerical digit
- Lowercase letter
- Uppercase letter
- Special character

If your company was enabled on the Opus Platform from Track & Trace Services, the following password settings from Track & Trace Services apply:

- Number of previous passwords that cannot be reused.
- Number of login attempts allowed before the account is locked.
- Number of days until the password expires.

If your company was *not* originally enabled on Track & Trace Services, the following default settings apply to TraceLink SSO:

- The previous 6 passwords cannot be reused.
- 5 login attempts are allowed before the account is locked.
- Passwords expire in 30 days.

### **Which browsers does the Opus Platform support?**

The Opus Platform supports the following web browsers:

- **Google Chrome:** Versions 57, 68, 74, or above
- **Microsoft Edge:** Version 80 or above
- **Microsoft Edge (Legacy):** Versions 16, 17, and 18
- **Mozilla Firefox:** Versions 60, 63, 67, or above
- **Apple Safari:** Versions 12.1.2, 13.0, or above

The Opus Platform supports the following mobile browsers:

- **Google Chrome Mobile:** Version 80.0 or above

- **Android Web View:** Version 80.0 or above
- **iOS Safari:** Version 13.1 or above

The screenshot displays the Kendall Pharmaceuticals Global Supplier Network interface. At the top, there are browser tabs for 'MINT - Global Supplier Net...' and 'SCWM - Global Animal Hea...', along with a 'Settings' link. The main header shows 'Global Supplier Network' with a user profile icon. A left-hand navigation menu is visible under the heading 'Manufacturing - Customer', with 'Purchase Orders' highlighted in a grey box and circled in orange. A blue line connects this menu item to the main content area. The main content area is titled 'Search Purchase Orders' and includes the text 'View all purchase orders sent by Silva Pharmacy to suppliers.' Below this is a table with columns for 'PO Number', 'Transaction Status', and 'St'. The table contains six rows of data, with the first row's 'PO Number' (260320210011) circled in light blue.

PO Number	Transaction Status	St
<a href="#">260320210011</a>	Delivered	Al
<a href="#">260320210012</a>	Inbound	GI
<a href="#">260320210017</a>	Delivered	Al
<a href="#">260320210024</a>	Inbound	Al
<a href="#">260320210057</a>	Delivered	GI
<a href="#">260320210089</a>	Delivered	Al

**Understanding Page Types within the Opus Solution Environment (OSE)**

Page types enable Solution Designers to efficiently create user-friendly pages using a drag-and-drop interface, allowing them to organize information for optimal usability.
