Advance Ship Notice (EDIFACT)

Shipment notices allow companies to exchange serialized data for sales shipments with upstream and downstream supply chain trade partners without giving these trade partners access to their serialization system of record. These shipment notices can be used to inform their Partners of the contents of a shipment, and the notices also allow these companies to comply with government regulations or recommendations for sharing serialized data about shipments.

The Advance Ship Notice (ASN) EDIFACT message sends data about a purchase order the supplier is fulfilling and notifies the buyer of the pending goods delivery.

Contact your TraceLink Services representative for more information about integrating with this message.
