Geocoordinates

Exchanging geographic coordinates allows suppliers, typically of agricultural goods, to communicate with their customers the exact location that their product was produced on. Communicating the exact location that goods were produced allows downstream supply chain partners (e.g. 3PLs, Wholesalers) to verify the origin of the good they receive, ensuring compliance with government regulations, such as the European Union Deforestation-free Regulation (EUDR) Information System (IS), that prohibit the sale of product sourced from illegal areas (e.g. land protected by deforestation laws).

Create and submit geocoordinates

Create and submit new geocoordinates.

Create and submit a new geocoordinate

- 1. Select a [MPL Network] from the Network drop-down in the header.
- 2. Select a Team (e.g. your entire company or a Link to a specific Partner or internal location) in the header.
- Select Commerce Supplier from the left menu.
 Partners must have the correct roles assigned by using the owner's instance of Multienterprise Information Network Tower.
- 4. Select Geocoordinate.

tracelink

- 5. Select the New button.
- 6. Enter the geocoordinate number in the Geocoordinate Number field.
- 7. Select the Save button.

The screen refreshes with the saved geocoordinate in the draft state.

- 8. Select the Edit _____ button.
- 9. In the Transaction Information section, select Submitted from the Process Status drop drown.
- 10. In the Geocoordinate File Information section:
 - a. Select the Add + icon. At least one coordinate is required to submit a geocoordinate.
 - b. In the Add panel, under Geocoordinates, fill in the following fields:
 - i. Producer Name field The name of the company responsible for growing, raising, manufacturing, or processing a food product.
 - ii. Producer Country drop-down The two-letter country code with country name for this location.
 - iii. Producer Place field The location or geographic area where a food product is grown, raised, manufactured, or processed.
 - iv. Geometry Type drop-down The physical shape or form of a food product.
 - v. Geocoordinates field A set of numerical values that represent a specific location on the Earth's surface using a coordinate system.
 - c. Select Apply.

The new line item is added to Geocoordinate File Information.

11. To submit the geocoordinates:

To save the geocoordinates in a Draft state and finish it later, ensure the

Move To button is not selected and then select the Save button in the draft state.
