API features

There is no new or updated API functionality included in this release.

System features

The following new or updated system functionality is included in this release.

Opus Administration Enhancements in the Networks, Links, Users, and B2B Integration UI Screens

Networks

This feature includes enhancements to make it easier for System Administrators and Application Administrators to administer networks in the Opus Platform UI. For more information about the corresponding solution feature, see the release.

Links

This feature includes enhancements to make it easier for System Administrators and Application Administrators to administer Links in the Opus Platform UI. For more information about the corresponding solution feature, see the release.

Users

This feature includes enhancements to make it easier for System Administrators and Application Administrators to administer users in the Opus Platform UI. For more information about the corresponding solution feature, see the release.

B2B Integration

This feature includes enhancements to make it easier for System Administrators and Application Administrators to configure B2B integration in the Opus Platform UI. For more information about the corresponding solution feature, see the release.

Impact analysis

The impacts for this feature is the same as the feature in the Administration, solution version 7.0 release.

View and Edit Company Network Information

This feature includes a new My Network Company Experience menu item to view and edit company information in the Opus Platform UI. For more information about the corresponding solution feature, see the release.

Impact analysis

The impacts for these features are the same as the feature in the Administration, solution version 7.0 release.

Resolved issues

Administration version 2024.4.1

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-37470:Customer unable to export audit trail data from Opus UI	API	Users are unable to export audit trail data from the Opus UI due to a back end error. This issue is resolved.
CMCP-37395: Unable to update SSO settings in the Opus UI	API	Users are unable to update SSO settings for their company through the Opus UI and it fails with an error message. This issue is resolved.

Resolved issues

Administration version 2024.4.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-37066: Bulk CSV link upload not working correctly	API	Link creation failed due to a back end error when attempt to create a location level Link using a CSV file. This issue is resolved.

Known issues

Administration version 2024.4.1

The following known issues are included in this release and will be fixed in a future patch release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-37471: Export user is not working in the Opus UI	API	When a user tries to export user information by selecting the Export icon in the All tab, the user does not receive a notification with the export results due to a timeout error.
