What's new in the Solution Builder, version 2024.2 release

Explore what's new in the Solution Builder, version 2024.2 release. To learn more about what's new in the Opus Solution Environment, version 1.0 that provides the user interface for this app, see What's new in the Opus Solution Environment, version 1.0 release.

Release information

This document describes the TraceLink capabilities included in the Solution Builder, version 2024.2 app release, which is available on Validation and Production on 12 Sep 2024.

The following apps are impacted by this release and will be updated to the version listed:

- Solution Builder, version 2024.2

  Solutions supported by this app version:

  - Opus Solution Environment, version 1.0

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

⚠ These release notes are subject to change based on the deployment of the release. In the event of changes, the release notes and any related documentation will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Revisions

Date	Revision	Description
10 Sep 2024	01	Initial version.
12 Sep 2024	02	Updated release date from 10 Sep 2024 to 12 Sep 2024.

API features

There is no new or updated API functionality included in this release.

System features

The following new or updated system functionality is included in this release. These features are changes to the app to support another feature and do not have any impacts on their own.

Create and Configure a Company Solution Based on Another Solution

This feature includes support to create and configure a new Company Solution by saving a copy of a Standard Solution or a Company Solution. For more information about the corresponding solution feature see the Opus Solution Environment, solution version 1.0 release.

Impact analysis

The impacts for these features are the same as the Create and Configure a Company Solution Based on Another Solution feature in the Opus Solution Environment, version 1.0 release.

Create and Configure Pages in a Company Solution

This feature includes support to create, search for, and configure pages in a Company Solution by leveraging a set of page types. For more information about the corresponding solution feature see the Opus Solution Environment, solution version 1.0 release.

Impact analysis

The impacts for these features are the same as the features in Create and Configure Pages in a Company Solution in the Opus Solution Environment, version 1.0 release.

Configure the Menu in a Company Solution

This feature includes support to create and configure the menu that appears in the side menu panel on the left side of their Company Solution. For more information about the corresponding solution feature see the Opus Solution Environment, solution version 1.0 release.

Impact analysis

The impacts for these features are the same as the Configure the Menu in a Company Solution feature in the Opus Solution Environment, version 1.0 release.

Create and Configure Roles and Policies

This feature includes support to create, search for, and configure roles and policies in a Company Solution. For more information about the corresponding solution feature see the Opus Solution Environment, solution version 1.0 release.

Impact analysis

The impacts for these features are the same as the features in Create and Configure Roles and Policies in the Opus Solution Environment, version 1.0 release.

Resolved issues

Solution Builder 2024.2.0

There are no resolved issues in this release.

Known issues

Solution Builder 2024.2.0

There are no known issues in this release.
