## Warehouse Stock Transfer Shipment Advice (X12)

Warehouse stock transfers enable suppliers' remote or third-party warehouse Partners to communicate with each other about the movement of product between locations without giving these Partners access to their serialization system of record. Warehouse stock transfers are used to initially distribute a large shipment of product that was received into a single warehouse, balance product inventory across their warehouses, or move product to a specific warehouse in preparation to fulfill an order.

Suppliers use warehouse stock transfer shipment advices to send notice from one remote or third-party warehouse to another that the product they are transferring has been shipped from their warehouse location to the receiving warehouse.

Contact your TraceLink Services representative for more information about integrating with this message.
