Podcast Episode 23: Timur Kabadayi on Patient Safety, Product Quality, and Supply Chain Data Integrity

Key Takeaways

- The most important aspect of **The Agile Supply Chain Credo** is its focus on patient safety and meeting patient demand right time, first time, every time.
- Companies across the end-to-end pharma supply chain produce and deliver medicines—but they also create data that can be shared to improve demand forecasts and boost supply chain agility.
- The global pharma industry could potentially save billions of dollars through digital supply chain enhancements—money which could then be reinvested in research and development.

PODCAST EPISODE 23:
Timur Kabadayı on Patient Safety,
Product Quality, and Supply Chain Data
Integrity

**The Agile Supply Chain
PODCAST**

Timur Kabadayı
Managing Director
Conval Group

Pharma companies are increasingly taking an end-to-end view of the supply chain so they can ultimately deliver the right patient outcomes. Data is a critical component that enables you to achieve this goal by enabling you to manage the product on its journey to the patient, according to Timur Kabadayı, Managing Director of Conval Group, an information technology consulting firm that specializes in the life sciences industry. In this episode of The Agile Supply Chain Podcast, Kabadayı explains how the right approach to data management can help pharma companies and supply chain teams improve product safety and quality.
