DSCSA 2023 Compliance: A Step-By-Step Guide to November 2023

Your pharmacy's **FDA DSCSA 2023 compliance**

deadline is November 27, 2023! [Health systems and retail pharmacies](#) will be required to receive electronic

transactions that include serialization and item-level

traceability data that must match the physical receipt. When electronic data does not match the drugs received, the receipt must be quarantined and the exception resolved before the product can be stocked. That's why you need to get ready now.

Watch our on-demand webinar, "**DSCSA 2023 Compliance: A Step-By-Step Guide to November 2023**" and you'll get a step-by-step guide to achieving compliance before the deadline while improving operational efficiency and patient care. Watch the webinar to:

- See how the [TraceLink network platform](#) simplifies fully interoperable and seamless EPCIS data exchange with your suppliers, and get an overview of our fast

and easy supplier onboarding process. Most of your drug suppliers are already on the TraceLink network!

- Meet the **TraceLink Healthcare Operations Services Team** (HOST), which provides support services and shoulders your compliance workload by managing product, partner, and company master data; paper-to-digital processing; continuous quality control checks; exception handling; and document preparation for audits.
- Learn how the TraceLink Customer Success Team continues to support health systems and retail pharmacies after they implement the TraceLink platform by sharing monthly statistics and holding quarterly business reviews.

You'll also learn how our compliance solution yields additional benefits by leveraging serialized receiving and scanning tools to improve inventory accuracy and speed up recalls. Fill out the form on this page to watch the webinar now!
