IOP GLOBAL HEAD

INFUSING INTELLIGENCE INTO YOUR SUPPLY CHAIN

TODAY AGENDA

1. VISION AND JOURNEY
2. NEXT STEPS ON IOP
3. CLOSING REMARKS

Science & Technology company

About MERCK KGaA

€70 bn
market
capitalization

>€2.5 bn
invested in
R&D

~ 63,000
employees

68
countries

1668
founded

**publicly listed &
majority family-
owned**

SOME YEARS AGO, IN THE FMCG WORLD...

We need to work from the real demand,
so that we produce what is actually selling,
not what is forecast to sell

Keith Harrison, former P&G Product Supply Officer

THE VISION:

DEMAND

automatically predicted

No human intervention

- **Machine Learnings Forecasting** (Advanced Analytics) fueled by a combination of..
- **Internal & external data** based on «real» demand signal and «broad network» info.

SUPPLY

proactively prescribed

*E2E/N2N
supply management*

- Control Tower driving **real-time synchronization** of the Merck E2E supply network combined with..
- **AI based BI** across the N2N supply ecosystem

THE JOURNEY:

As-is: Siloed

Retrospective

- Silos of raw data
- Limited visibility
- Inaccurate

Step 1
Advanced Planning
“Self Driving SC”

Descriptive Planning

- Advanced Analytics Forecast
- Machine Learning
- Demand Sensing

Step 2
From S&OP to IBP
“One Number”

Predictive & Prescriptive

- ONE Number Concept
- ONE source of Truth
- ONE integrated Plan

Step 3
From IBP To IOP
“Truly E2E”

E2E Supply Chain

- E2E synchronised data driven decision making
- Real time predictive modelling

Step 4
Moving beyond our walls
“N2N”

N2N Supply Network

- Realtime info and BI across the Network2Network ecosystem
- AI based automation for prescriptive capabilities

THE JOURNEY:

As-is: Siloed

Retrospective

- Silos of raw data
- Limited visibility
- Inaccurate

Step 1
Advanced
Planning
“Self Driving SC”

Descriptive
Planning

- Advanced Analytics Forecast
- Machine Learning
- Demand Sensing

Step 2
From S&OP
to IBP
“One Number”

Predictive &
Prescriptive

- ONE Number Concept
- ONE source of Truth
- ONE integrated Plan

Step 3
From IBP
To IOP
“Truly E2E”

E2E Supply
Chain

- E2E synchronised data driven decision making
- Real time predictive modelling

Step 4
Moving
beyond our walls
“N2N”

N2N Supply
Network

- Realtime info and BI across the Network2Network ecosystem
- AI based automation for prescriptive capabilities

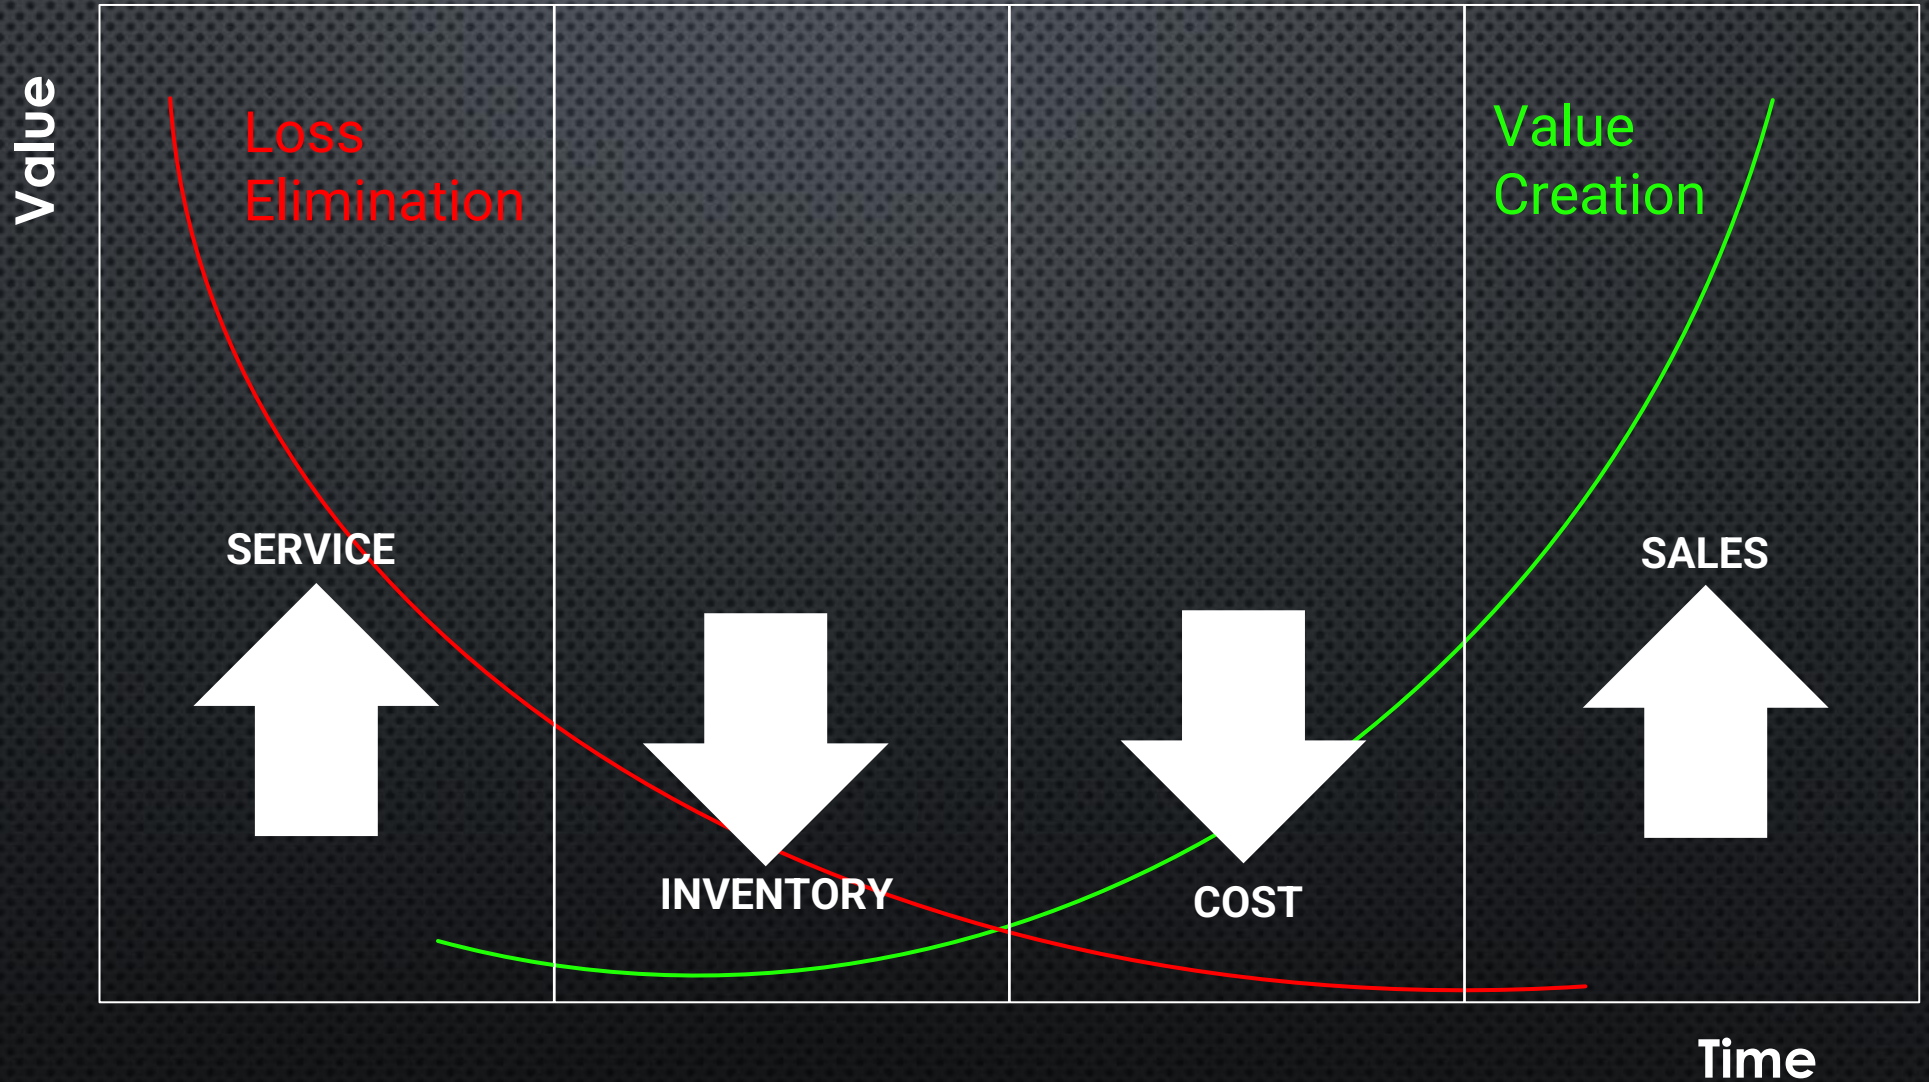

THE IMPACT:

Step 1
Advanced
Planning
"Self Driving SC"

Step 2
From S&OP
to IBP
"One Number"

Step 3
From IBP
To IOP
"Truly E2E"

Step 4
Moving
beyond our walls
"N2N"

INFUSING INTELLIGENCE INTO YOUR SUPPLY CHAIN

TODAY AGENDA

1. VISION AND JOURNEY
2. NEXT STEPS ON IOP
3. CLOSING REMARKS

IOP (Integrated Operation Planning)

As-is: Siloed

Retrospective

- Silos of raw data
- Limited visibility
- Inaccurate

Step 1
Advanced
Planning
"Self Driving SC"

**Descriptive
Planning**

- Advanced Analytics Forecast
- Machine Learning
- Demand Sensing

Step 2
From S&OP
to IBP
"One Number"

**Predictive &
Prescriptive**

- ONE Number Concept
- ONE source of Truth
- ONE integrated Plan

Step 3
From IBP
To IOP
"Truly E2E"

**E2E Supply
Chain**

- E2E synchronised data driven decision making
- Real time

Step 4
Moving
beyond our walls
"N2N"

**N2N Supply
Network**

- Realtime info and BI across the Network2Network ecosystem
- AI based automation for prescriptive capabilities

The industry

- 79% of supply chain organizations plan to achieve real time "data driven" decision making

- 50% of big companies will revise their SC "decision making" governance, to be more data-driven

- 50% of global companies will have 15% of new "AI-augmented" employees, (e,g, Augmented-connected workforce)

- the companies better using AI will produce 3 times more value (from AI) than the others

With IOP we achieve....

Synchronized

Data-Driven

Real time

Forward-looking

X-functional

Decision
Making

**....for operations-associated
decisions**

It sounds like science fiction....

Service
Cost
Inventory

Quality
Sustainability
Assets Utilization

"Landing page" for simulations

Simulations/Use cases by

- 1) Capacity adjustment (FTE, Shifts, OEE)
- 2) Quality vs Manufacturing synchronization
- 3) Cost absorption (e.g. Dollarization)
- 4)
- 5)

New baseline

Deep dive

Legend: Benchmark / Target (white), Site / Franchise / Region A (light grey), Site / Franchise / Region B (yellow), Site / Franchise / Region ... (dark grey)

Business Impact

- Higher assets utilization
- Better Supplier OTIF
- Working inventory reduction
- Obsolete inventory reduction
- Transportation cost reduction
- Warehouse cost reduction
- Forecast accuracy increase
- Planning improvement
- Quicker decision making
- Higher sales

We tend to overestimate effect of technology in the short run and underestimate the effect in the long run..

Roy Amara

INFUSING INTELLIGENCE INTO YOUR SUPPLY CHAIN

TODAY AGENDA

1. VISION AND JOURNEY
2. NEXT STEPS ON IOP
3. CLOSING REMARKS

Closing Remarks

1

Don't look for the "silver bullet" tool. It doesn't exist.
Focus on **CHANGE Mgt** and **PEOPLE**.

2

DIGITAL is an **enabler** to drive business value (accelerator) through more efficient and effective processes.
However, NO „clean“ DATA, NO „real“ VALUE.

3

No company is a silos any more. Supply networks are complexifying and volatility is increasing upstream and downstream..
Network collaboration N2N will become the true source of COMPETITIVE ADVANTAGE.
