Life Sciences Supplier Networks are Increasingly Complex

- 2024 research by Root Analysis projects CMOs to have 64% of API manufacturing market share by 2030
- 2024 research from IDC cites increased collaboration with suppliers as a key focus area for supply chain leaders in the next 12 months

Multi-enterprise networks are not synchronized

Fractured collaboration network

Make

Manufacturing, Contracting, and Co-packers

Distribute

Warehousing, 3PL, Transportation, Dealers

Deliver

Pharmacies, D2C, Healthcare Systems, Distributors

Disconnected data and disparate systems leads to expensive manual processes

Inefficient operations drives higher costs and emissions

Highly vulnerable to disruptions due to slow decision processes

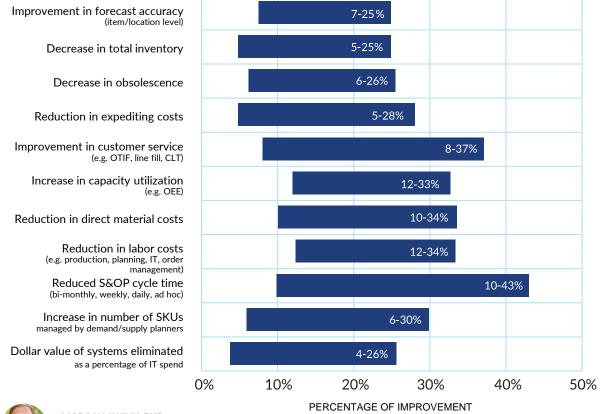

Orchestrate your supply chain in complete harmony

Achieve accelerated value

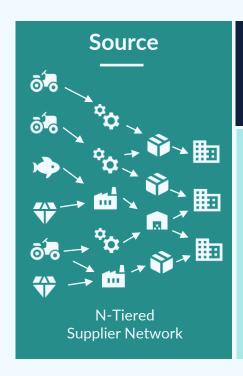

70% of companies saw significant KPI improvement within first 12 months

MORGAN SWINK, PHD EXEC. DIRECTOR AND PROFESSOR CENTER FOR SUPPLY CHAIN INNOVATION

Unified collaboration network

Make

Manufacturing, Contracting, and Co-packers

Distribute

Warehousing, 3PL, Transportation, Dealers

Deliver

Pharmacies, D2C, Healthcare Systems, Distributors

A unified data fabric powers decision automation to maximize agility

Intelligent planning algorithms can drive down cost and emissions

Collaborative exception workflows align strategy & execution

Kinaxis Agility TraceLink

Through the TraceLink Network, onboard and gain connectivity with your Supply Chain Network; such as, your contract manufacturers, suppliers, 3PLs, distributors, and customers.

- 10+ years curated Healthcare and Life Sciences Network
- 290K+ Total Network Members
- Each company maintains a single connection to TraceLink.
- Trusted, secure digital network platform
- Single shared experience
- Supplier Onboarding-aligned engagement model
- Partners are onboarded at no cost, including ongoing maintenance.
- Dedicated Network Success Team

Company

KINAXIS

Real time supply chain information enabling better decision making.

Faster exception resolution, and more accurate plans.

Supply Chain Planner

tracelink

NETWORK FOR GREATER GOOD

Create Virtual Collaboration Networks

Accelerate Partner Data Exchange and Work-Flow Driven Collaboration

Purch. Order / Purch. Order Ackn. / ASN
Inventory Balance / Warehouse Stock...
More than 40 transactions types available

Manage supply chain issues and planning exception with your CMOs / 3PLs / suppliers.

Real Time Visibility

CMOs / 3PLs / Suppliers

"The integration of Kinaxis and TraceLink's platforms will give me actionable visibility to critical exceptions, it will give teams from across our supply network the digital capabilities required to resolve exceptions faster, and it will improve the overall quality of the supply plan."

Frank Binder
Global Head of Supply Chain Management
Santen

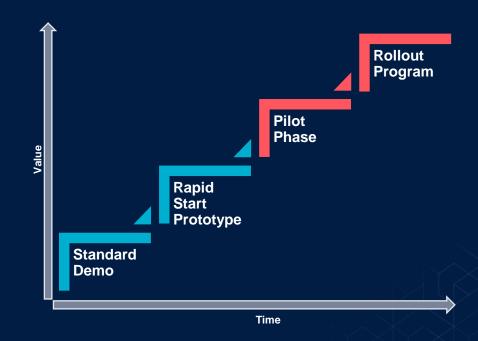

Creating Value with Rapid Start Prototype Methodology

Agility is **not only** about **accuracy**. it's about **collaboration** and **speed**.

Our methodology focuses on incremental, tangible outcomes to adapt quickly—whether to retrace steps or continue driving value forward.
